

# Structured Pricing Tiers

**Choose the tailored pricing tier that fits with your organization**

Each pricing tier is structured for different styles of investigative work and is designed to match the size and requirements of different organizations. To talk with a team member and walk through the tier that will work best, schedule a demo, and begin your journey to investigative success.

## Included In All Tiers

Every pricing tier of Kaseware includes personalized implementation to ensure your platform is set up exactly to your preferred style and layout, as well as dedicated support from a Kaseware Customer Operations Team member to assist in everything from training, configuration, and support throughout your mission. Each tier includes a suite of investigative tools, however, our higher tiers include features to meet the needs of the most complex missions.
