Public Safety Solution

KASEWARE + **ESHARAH** Etisalat & Security Solutions اشــارة للاتصــالات والحلـول الأمنيـة

Kaseware partners with local service providers who know their customers best. The system can be deployed through local hosting options and easily translated into any language. Kaseware and its partners make it easy to learn about, select, and deploy Kaseware throughout the world.

Industry Overview

Governments worldwide are faced with daunting challenges in their mission to ensure their citizens' safety and security, enforce their laws, and provide the best response possible to dynamic and diverse incidents. The need to deliver extensive services to public safety, while simultaneously conducting complex investigations and threat analysis, requires the government to leverage best-in-class technologies that are flexible, comprehensive, configurable, and secure.

The Kaseware platform centralizes best-in-class solutions for case management, intelligence analysis, investigations management, records management, evidence management, dispatching, and reporting into a single solution.

About Kaseware

Kaseware is the premier suite of software tools for investigators, analysts, agents, and officers around the world. The company has supported organizations in the public and private sectors since 2016 and couples an amazing product with outstanding service. Founded by investigators and special agents, for investigators and special agents, Kaseware is dedicated to making your mission its own.

Regional Challenges

- Digitization of processes and business operations
- Localization of languages within software systems
- Siloed data in different, outdated, legacy systems
- Lack of comprehensive reporting, metrics, and KPIs
- Macroeconomic, social, environmental, and technological changes

Kaseware Solutions

Built-In Analytics
Completely customizable features such as dashboards, reports, metrics, KPIs, and visualizations in Kaseware give law enforcement and government leaders the tools they need to prove the value and performance of their public safety and intelligence programs and teams.

Efficient Investigations
Kaseware is uniquely architected with the flexibility to efficiently enhance, secure, enable, and streamline any internal or external investigation and analysis process.

Intelligence Analysis
Kaseware's advanced graph database, analytics, and intelligence tools give governments the ability to detect threats, conduct sophisticated investigations, and perform advanced threat analysis in one platform.

Configurable Solutions
Kaseware provides flexible and scalable tools to collect, aggregate, and analyze data from disparate sources, giving analysts the tools needed to efficiently surface, manage, and mitigate threats.

Critical Information In One Place
Manage and conduct any process within a single solution and connect the dots between incidents, operations, threats, and seemingly unrelated data points.
