

Accurint® Public Safety Marketplace Connected Integrator: Kaseware

The Accurint® Public Safety Marketplace is designed to provide law enforcement with seamless access to enhanced tools when needed most. As part of the Accurint Public Safety Marketplace, users can now purchase an application programming interface (API) that will provide more comprehensive data insights without having to access multiple different products to manually connect data to develop actionable intelligence. Customers can now integrate the identity data found in Accurint® for Law Enforcement alongside additional connected solutions for law enforcement.

Our vast information repository, with over 14 petabytes of data encompassing 91 billion records from more than 10,000 different sources, can be seamlessly integrated directly into the systems you, your analysts, officers, and agents use today. Our proprietary linking technology ensures you have a comprehensive view of individuals you are investigating with over 99.99% precision, enhancing identification and connection of disparate records.

Integration Elements for Kaseware:

- Address Report
- Comprehensive Report
- Find a Person Search
- Person Search
- Relatives, Neighbors & Associates Report
- Real Time Phones Search
- Property Report
- Business Search
- Comprehensive Business Report
- Find a Business Search
- LexID® Search

Kaseware is now a connected integrator through the Accurint Public Safety Marketplace.

Kaseware is a reliable destination for police software and law enforcement intelligence tools, setting the standard for innovation. Kaseware designed their investigative case management and analytics platform with streamlined case management features and innovative system capabilities that improve communication, safety and efficiency. Kaseware's all-in-one police investigation software is ideal for conducting use-of-force investigations and managing other important cases efficiently and transparently.

Kaseware's investigative case management system features innovative intelligence tools that your police agency can use to improve operational efficiency during investigations. Data from Accurint for Law Enforcement can now be seamlessly integrated into Kaseware, turning raw data into actionable intelligence, and facilitating easier data collection and analysis. Combined with Kaseware's configurable workflow processes and business rules, users and teams can manage investigations more efficiently by creating a unified view of cases and analyzing information without switching between multiple platforms. This synergy allows for efficient, detailed link analysis, connecting the dots between people, places, and things.

Using Accurint for Law Enforcement and Kaseware together can help agencies:

- Reveal last known contacts, relatives, and locations to locate fugitives and identify new leads in missing persons and cold cases
- Understand possible associates connected to gang members through known addresses
- Research suspects to reveal aliases, financial history, and non-obvious connections to other potentially fraudulent activities
- Monitor financial activity or determine assets for restitution purposes
- Locate informants or witnesses needing protection
